🗎 Summary

Hi there! My name is Sean. I'm aspiring to help reduce friction in the user experience for modern day applications, games and media. I believe accessibility features should be in every application to allow the widest reach of users and to help our future generation of elderly who are comfortable using technology right now.

I use my computer every day and always appreciate it when tech is used to express art and design in a way that is both intuitive and stylised. I want to contribute to a design of some tech and see how people feel when using it.

☑ Education

Bachelor of Computer Science from UTS
Expected finish Jun 2026
Majoring in interaction design for websites, applications and physical technology.

Diploma of Software Development from TAFE NSW
Finished 2020
Web & application development in C++, React, Java and asp.net core

Diploma of Information Technology from UTS College
Finished 2018

⏱ Career history

User Experience and Interface Designer at YouBeauty

June 2026 – Current
Leading in UX and UI design for the YouBeauty mobile application and web application. Proposing and drafting lowfi designs to share with users, artists and the development team.

Features that are available on the app today include:

- Map UI and search redesign
- Revamped map filters page
- New service icons
- New artist profile page
- New customisation tools for artists including tags, service categories and addons templates

Features that are currently in the works include:

- Web application modernisation
- Artist loyalty program

User Experience and Interface Designer at Jaimee.AI

Apr 2026 - May 2026 (2 months)
Internship for 8 weeks.

Mix of front-end testing and design for upcoming update for Jaimee.ai mobile app. For testing I used Notion, Claude and VSCode to create, analyse and solve user experience cases.

For interface design I mainly used Figma with inspiration from Mobbin to follow the vision of the app. I was required to focus on features such as gamification, retention and navigation.

Quality Control Role at Moi Moi Fine Jewellery

Jan 2021 - Jan 2025 (5 years)

Organising, checking and distributing items appropriately to each order. For example, if a ring needed to be set which jeweler does it go to or if a piece is damaged what can we do to fix it. Some days going through 50+ pieces that need to be checked thoroughly to upkeep company standards.

Helping my colleagues with their requests from customers who have short time frames and working out which jeweler is best suited for the job. Forming and maintaining good relations with jewelers around the city.

Waitperson at Hai Yen Resturant
Apr 2016 - Apr 2020 (5 years)

Assist graphics designer (work experience) at KannFinch
Jul 2014 - Jan 2015 (7 months)
